SUMMARY

Results-oriented BCA graduate and aspiring Data Analyst with strong technical proficiency in SQL, Python, and Advanced Excel, alongside hands-on experience building interactive dashboards in Power BI and Tableau. Adept at data cleaning, exploratory data analysis (EDA), and tracking key business KPIs to extract actionable insights. Possesses a solid foundation in relational database management (DBMS), statistical analysis, and data storytelling, eager to leverage analytical problem-solving to optimize business decisions in a data-driven environment.

EDUCATION

North Eastern Hill University (NEHU) **Completed-2026**

Bachelor of Computer Applications(BCA)

- St. Edmund's College, Shillong

SKILLS

Programming Language: Python(NumPy, Pandas, Matplotlib)
Database: SQL, MySQL, DBMS, RDBMS
Data Visualization: Tableau, Power BI
Tools: Advanced Excel(Pivot Tables, Pivot Charts, XLOOKUP, VLOOKUP, Power Query), VS Code, Git & GitHub, MS WORD, MS Power Point
AI Tools: ChatGPT, Claude Code, DeepSeek , OpenAI, Anthropic, Gemini, Perplexity, Grok
Core Competencies: KPI definition & tracking, EDA, Data Cleaning, Data Wrangling, Data Storytelling, Predictive Analysis, Strategic & Statistical thinking, AI Analytics

PROJECTS

iPhone Sales Analytics & Business Intelligence Dashboard

SQL | Python | Pandas | NumPy | Power BI | DAX

- Analyzed 100+ iPhone sales transactions across models, storage configurations, payment methods, and global markets to identify revenue drivers and customer purchasing behavior.
- Performed data cleaning and exploratory data analysis (EDA) using Python (Pandas, NumPy) for missing value handling, duplicate removal, correlation analysis, and outlier detection.
- Executed MySQL queries to analyze sales trends, region-wise revenue distribution, storage variant performance, and order-level business metrics.
- Designed a two-page interactive Power BI dashboard featuring custom DAX measures for dynamic KPIs, monthly sales trends, customer segment insights, and interactive filters.

AI-DrivenJob Layoff & Automation Risk Analysis - Power BI

Power BI | Power Query | DAX | Data Modeling | Interactive Dashboards

- Developed a two-page interactive Power BI dashboard analyzing 20,000 workforce records across AI adoption, task automation, industries, job roles, education, and job seniority.
- Used Power Query for data preparation and created analytical bands for routine-task exposure and experience.
- Developed DAX measures for Total Records, High-Risk Records, High-Risk Rate, Average Task Automation, AI Usage, and AI Training Hours.
- Identified key patterns including a 48.2% high-risk rate in Manufacturing, 34.0% overall high-risk classification, and 80.8% high-risk rate among high-AI-adoption records.

CERTIFICATIONS & ACHIEVEMENTS

Certifications:

- Data Analytics Essentials, CISCO Networking Academy — August 5th, 2026
- Real-World Data Science Hands-On with Python & ML, Google(GDG) — April 3rd, 2025-April 5th, 2025
- Python 3 Bootcamp, Lernx — June 2nd, 2024

Achievement:

- Emerged as a Semi-Finalist in the DRISHTI-NE Hackathon organized by IIM Shillong during the Unstop Holiday Fest 2025.
